DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Mori et al (US 6,367,595).

Mori et al disclose a disc brake caliper comprising a caliper housing, including a front, rear, and bridge section. The front, rear, and bridge section form a cast one piece structural configuration. The inner shaped surface including at least one inner cylindrical surface, first and second cast in passageways. The first and second passageway means including a cylinder connecting section having an inner end portion. Means for forming a fluid connection section that intersects the cylinder connecting sections to produce a continuous fluid flow path between the front and rear section (figures).

Allowable Subject Matter

3. Claims 23-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
